

OKONMAH RAPHAEL OGOCHUKWU

FULL STACK DEVELOPER INTERN

08108944369 | raphaelokonmah3@gmail | ASABA, DELTA STATE, NIGERIA

[LinkedIn URL](#) | [GitHub URL](#) | [Portfolio URL](#)

PROFESSIONAL SUMMARY

Motivated Software Engineering graduate with a First-Class degree and hands-on experience building full-stack web applications, business management systems, learning platforms, and organizational websites. Proficient in Python, Flask, FastAPI, Django, PHP, CodeIgniter, JavaScript, MySQL, and SQLite. Experienced in backend development, responsive frontend development, database design, authentication, role-based access control, and application deployment using Docker, Linux, Nginx, and Gunicorn. Delivered software solutions for real organizations and currently provide IT consulting and technical support for a hospital Electronic Medical Record (EMR) system. Seeking a Full Stack Developer Intern position to contribute practical engineering skills and grow within a collaborative development team.

TECHNICAL SKILLS

Backend: Python, Flask, FastAPI, Django, PHP, CodeIgniter

Frontend: JavaScript, HTML5, CSS3, Bootstrap

Databases: MySQL, PostgreSQL

Tools & Version Control: Git, GitHub, Docker

Deployment & Systems: Linux, Ubuntu, Nginx, Gunicorn

Core Competencies: REST APIs, CRUD Applications, Authentication, Role-Based Access Control, Database Design, Responsive Web Development

Currently Exploring: Solidity, Foundry, Anvil, Smart Contract Security, Web3 Auditing

PROFESSIONAL EXPERIENCE

IT Consultant | Federal Medical Centre, Asaba

April 2026 – Present

- Provide technical consulting and operational support for the hospital's Electronic Medical Record (EMR) and hospital management systems.
- Participated as part of the technical team involved in deploying the hospital's EMR system.
- Troubleshoot and resolve system-related issues reported by users and stakeholders, providing ongoing post-deployment support.
- Assist with system updates, maintenance, configuration, and optimization to improve EMR reliability and day-to-day performance.
- Support the management and optimization of physical IT systems and infrastructure required for effective EMR operation.
- Work with relevant teams to identify technical issues, recommend solutions, and maintain continuity of hospital information systems.

CTO & Lead Developer | Emoefe Digitals

September 2025 – Present

- Lead the design and development of web applications and digital solutions for businesses and organizations.
- Develop backend systems and database-driven applications using Python, Flask, PHP, CodeIgniter, MySQL, and SQLite.
- Build responsive user interfaces using HTML, CSS, JavaScript, and Bootstrap.
- Contributed to the development and delivery of a Learning Management System and other organizational software solutions.
- Support application deployment and server configuration using Docker, Linux, Nginx, and Gunicorn.
- Train and mentor more than 10 students in web development and practical software development skills.

Software Developer | Recurra

May 2026 – Present

- Develop, maintain, and improve full-stack software features for a recurring payments platform.

- Update and maintain the existing codebase, implementing changes and enhancements based on business requirements, user feedback, and evolving product needs.
- Develop and modify backend functionality, database-driven features, and user-facing application components.
- Investigate and resolve software issues to improve system reliability, functionality, and overall user experience.
- Collaborate with team members to translate product requirements into functional and maintainable software solutions.
- Support ongoing system maintenance, testing, debugging, and performance improvements.
- Help ensure that platform features continue to operate smoothly as the application evolves.
- Contribute to the development and improvement of a platform that enables businesses to manage recurring payment workflows.

ICT Intern / Software Developer Intern | Federal Medical Centre, Asaba

April 2024 – September 2024

- Supported ICT operations and software development activities within the organization.
- Developed an e-library web application using PHP, CodeIgniter 4, MySQL, JavaScript, HTML, CSS, and Bootstrap.
- Designed database-driven features for organizing and accessing digital learning resources.
- Worked with organizational stakeholders to understand requirements and translate them into application functionality.

SELECTED PROJECTS

Inventory Management & Point-of-Sale (POS) System | Deployed / Emoefe Digitals

Technologies: PHP, CodeIgniter, HTML, Tailwind CSS, JavaScript

- Developed a system for uploading, managing, and monitoring business inventory.
- Implemented stock tracking and low-stock alerts to support timely restocking decisions.
- Built sales-team functionality that allows authorized sales personnel to record sales from their own accounts.
- Ensured sales transactions automatically update inventory records and are reflected on the owner's management side.
- Implemented transaction history, sales monitoring, profit tracking, and reporting features.
- Added certificate/document generation and printing functionality.
- Combined inventory management, sales-team management, transaction tracking, and POS workflows in one platform.

Learning Management System | Emoefe Digitals

Technologies: Python, Flask, MySQL, JavaScript, HTML, CSS, Bootstrap, Paystack, Mailtrap

- Developed backend and frontend functionality for managing users, courses, learning content, and online learning activities.
- Integrated Paystack payment functionality and email workflows using Mailtrap during development.
- Improved platform performance through SEO optimization and image lazy loading.
- Contributed to deployment, maintenance, and ongoing development of the platform.

School Management Software | Great Blossom Academy

Technologies: PHP, CodeIgniter, MySQL, JavaScript, HTML, CSS, Bootstrap

- Developed a multi-user school management system with role-based functionality for administrators, Heads of Department, secretaries, and teachers.
- Built database-driven workflows and access controls to support academic and administrative operations.
- Designed responsive interfaces for managing users, records, and organizational activities.

Delta Journal of Clinical Practice Website | MDCAN, Federal Medical Centre, Asaba

Technologies: PHP, CodeIgniter, MySQL, JavaScript, HTML, CSS, Bootstrap

- Developed and delivered a professional journal website for a real medical and academic organization.
- Built responsive, database-driven functionality for publishing and managing journal-related content.
- Supported deployment, maintenance, and ongoing website updates.

Automated Eye-Gaze Tracking System for Detecting Malpractice in Online Assessments | Final-Year Project

Technologies: Python, Flask, FastAPI, OpenCV, MediaPipe Face Mesh, NumPy, JavaScript

- Developed a computer-vision prototype that analyzes facial landmarks and eye-gaze direction during online assessments.
- Implemented calibration and prolonged-look-away detection logic to identify potentially suspicious behavior.
- Explored real-time communication using WebSockets and Python-based backend services.

E-Library Web Application | Federal Medical Centre, Asaba

Technologies: PHP, CodeIgniter 4, MySQL, JavaScript, HTML, CSS, Bootstrap

- Developed a database-driven e-library application for organizing and accessing digital learning resources.
- Applied CodeIgniter's MVC architecture and built responsive interfaces for users.

EDUCATION

B.Sc. Software Engineering | University of Delta, Agbor, Delta State, Nigeria.

Graduation Year: 2025 | Degree Classification: First Class Honours | CGPA: 4.80 / 5.00

ACHIEVEMENTS

- Graduated with a First-Class degree in Software Engineering.
- Delivered software solutions for real organizations, including a Learning Management System, School Management Software, and Journal Management Website.
- Trained and mentored 50+ students in web development and practical software development.
- Built and deployed web applications using Docker, Linux, Nginx, and Unicorn.
